A Proposal for the 48/96 Work Schedule
Disclaimer!

This presentation is informational in nature and is **NOT** at this time endorsed, supported, or under consideration by either Orange County Fire Authority Administration or the Local 3631 Board of Directors. Rather, it is a “Grassroots” effort to educate our members on a viable alternative to our current work schedule.
Introduction

The purpose of this presentation is to present the issues relevant to changing our work schedule to 48 hours on, 96 hours off.

The proposed schedule change would ONLY be on a trial basis.

This presentation is designed to give fair treatment of the issues and answer many questions.

Comments are welcome from all.
What Is A “48/96” Work Schedule?

A “48/96” work schedule is simply this: each shift works two consecutive 24 hour work periods for a total of 48 hours, then has 96 hours off before repeating this pattern of two days on, four days off.

FLSA time will not be affected.
The History of the 48/96 Work Schedule

According to a study conducted by San Jose Firefighters, the 48/96 schedule has been used by professional fire departments since the early 1990s.

Many departments have switched to this schedule resulting in:

- relief from long commutes
- increased morale by providing additional four-days
- more weekends off
- increased family time
The History of the 48/96 Work Schedule (cont.)

- At this time there are at least 64 departments using the 48/96 schedule.
- Several others are actively investigating it. The Los Angeles City Fire Department, for example, is about to take it to their members for a vote.
- There is also a strong movement in the Los Angeles County Fire Department.
Most departments that considered the schedule change first voted for a six-month or one year trial period. In some cases, an escape clause was added to the agreement to allow labor or management to opt out of the trial period at any time. No department has exercised this clause.
Fire Departments Working the 48/96

Albuquerque Fire

- Responds on over 50,000 calls a year
- Six of Albuquerque’s 21 stations run between 350 and 500 calls a month
- 12 to 17 calls per day
- 36 to 51 calls per tour
- Perform ALS
- Has been working the 48/96 for nine years
Fire Departments Working the 48/96 (cont.)

City of San Bernardino Fire Department
- 11 stations
- Three stations run 350 to 500 calls per month
- 12 to 17 calls per day
- 36 to 51 call per tour
- Perform ALS
Orange County Fire Authority

- Busiest Engine Company E61
- Busiest Medic Van M21
  - Run just over 300 calls per month

- 5 other Engine Companies
  - E22, E222, E19, E24, E29
  - Run between 250-300 calls per month
Interesting Findings

- All of the departments working the 48/96 share an overwhelming level of satisfaction with the schedule.
- None of the agencies chose to return to their previous schedule.
Comparisons of the 48/96 vs. the OCFA Schedule

- No differences for administration
- 3 Platoons, ABC shifts
- 56 hours per week
- 112 hours per pay period
- 121 shifts per year
What Does the 48/96 Schedule Look Like?

Current Schedule

- Presently you work 4 of the same day in a row
- This results in missing 4 of your kids’ games in a row

48/96 Schedule

- The most games you miss is 2 in a row
- Less time on the road
- Less hold overs causing you to miss that 8am game, school program, or doctor’s appointment
What Happens If One Shift Is Scheduled To Work Both Christmas Eve and Christmas Day?

- The shift working the 23rd would flip-flop with the shift on the 24th (see example on following slide).
- This only occurs 8 times between 2006 and 2026.
Christmas Sample

4 Vacation Days = 16 days off
How Will the 48/96 Schedule Benefit My Commute?

Current Schedule
- 120 Shifts/year
- 240 commutes

48/96 Schedule
- 60 “Shift cycles”/year
- 120 commutes
- 50% Reduction
Regardless of your fuel cost you will cut it in 1/2 with the 48/96 schedule!

You will also see brakes, tires… last much longer

Save wear and tear on yourself by sitting in traffic 50% less.

Have 50% less exposure to a possible traffic accident.

Fewer miles driven per year will reduce your car insurance costs.

Car retains value over a longer period due to lower mileage.
Overtime & Trade Policies

- Same as it is now (per SOP AM 103.16)
- Current 72/96 hour rule remains intact
- Overtime opportunities will be the same for each shift
- If you take one vacation day you still work your second shift
- You can still take ½ shifts (12 hours)
- All current trade policies remain the same!

Overtime Potential Comparison

- With the 48/96 Schedule, you could work four overtimes per month, never work a 72-hour shift, and still have three complete 4-Days left

- It is impossible to do that with our current schedule
Fatigue and the 48/96

One of the biggest advantages of the 48/96 schedule is that it allows employees more opportunity to recover from sleep deprivation/long-term fatigue.
Fatigue and the 48/96

- Departments found that after the schedule change, the concerns about increased fatigue were not realized.
- Departments found that over time the schedule can significantly reduce fatigue.
- Departments saw no increase in injuries or disabilities resulting from the schedule change.
- Departments have seen a reduction in sick leave use.
Fatigue and the 48/96

During busy periods short-term fatigue would be expected to increase for some individuals working our current schedule, the 48/96, or with any schedule.

It’s the nature of being a firefighter.

Many employees already voluntarily work extended shifts, i.e. 48s, 72s & 96s.
Fatigue and the 48/96

- The 48/96 increases rest periods (4-days) from 30 to 60 a year...
  - a 100% Increase
    - the frequency of “4-days” increases to a “4-day” every 2 days as opposed to every 8 days with OCFA’s schedule
Fatigue and the 48/96

The 48/96 increases the number of “sleep in days” (days waking up at home and not going to work) from 10 to 15 per month... a 50% Increase
Fatigue and the 48/96

The 48/96 reduces the number of days/hours an employee spends getting ready for work and commuting by 50%.
Pollution Reduction

Based on 2005 standards, the SCAQMD has calculated that our commuting produces, on an annual basis, approximately based upon your information you have provided:

- **87,870** Pounds of Carbon Monoxide
- **8,944** Pounds of Oxides of Nitrogen
- **8,318** Pounds of Volatile Organic Compounds

We commute approximately 6.6 million miles per year which is equal to over 13.6 round trips to the moon.

We can cut these figures in 1/2 by using the 48/96 schedule.

An official recalculation will be performed after official data is obtained from Local 3631 or Fire Administration.

Why Management Would Like the 48/96 Schedule

- Approximately ½ of the relief problems associated with extended incidents and day-to-day operations

- To address the “work/rest cycle” concerns, any incident over a certain length could be automatically placed into a 2:1 work/rest cycle. i.e. 16 hours on, 8 hours off, which follow Federal guidelines
A 50% reduction in employee commutes
Will remove up to 500 cars every other day from congested southland freeways
Will result in a significant reduction of air pollution
Possible significant monetary incentives to the department for such a large reduction of air pollution [www.aqmd.gov/localgovt/AB2766.htm](http://www.aqmd.gov/localgovt/AB2766.htm)
A political feather in their cap
They will be seen as doing something proactive for the environment
Why Management Would Like the 48/96 Schedule (cont.)

- Increased productivity, shift works for two days in a row
- Classroom/Hands-on training can be scheduled evenly between the two consecutive shifts
- Cut morning briefings by half
- Reduce hold-over issues and cost by 50%
- Projects can be started and completed more readily over two consecutive days
- Can return phone calls & follow-up on day two
- Easier to follow-up on repair issues
Would the 48/96 Schedule Affect Our Fire Inspection Program?

No! The current schedule and the 48/96 schedule both offer each shift an average of 7 weekday shifts per month for inspection duties.

</tbody>
</table>
Alternative schedules to 48/96

- Decreases four-days
- Decreases time at home with family
- Decreases mornings at home
- Decreases full weekends off
- Increases long-term fatigue
- Increases commuting
- Increases fuel costs
- Requires firefighters to work 72’s or give up the few 4 or 6 days they receive.
PRO’s

- Every time you go home you have 4-Days off
- 5 four days a month
- 8 More full weekends off per year
- More opportunities to work OT without working 48 or 72 hours straight
- Better continuity of workflow for two days in a row
PRO’s (cont.)

- Increase in morale as seen in other Departments that have switched
- More time with family and friends
- Number of commutes and mileage cut in half
- Take 2 vacation days and have 10 days off
No matter what your current costs are for gas, tires, oil changes, brakes… These costs will drop by approximately 50%!

Car insurance costs should also decrease because of a 50% reduction in your commuting mileage. The 48-96 affords more full weekends off, allowing employees to engage with their children’s sports teams, take weekend family trips, or participate in other activities.
POTENTIAL CON’s

- Every time you work your scheduled shifts it is for 48 hours.
- May temporarily disrupt current family routine.
- Both days of a weekend (Sat and Sun) will be worked 9 times per year.
- Second shift of cycle could be more demanding if a busy first shift occurred. However, 48 and 72-hour overtimes and shift trades are already commonplace at such stations.
- Decrease in morale of some members who do not want to try the 48/96.
POTENTIAL CON’s (cont.)

- The more OT you work the less 4 days you will have (but you have twice as many to begin with)
- Some members face unique challenges in regards to childcare, child custody, care of an elderly parent or ill family member
- Taking a single shift off creates a “5-day,” not six or four days off, as with the current schedule
How Have Other Departments Voted?

- Trial Period: 52% to 84% in favor
- Permanent Change: all but 2 departments were 90% to 100% in favor
  - The other 2 dept’s were 75% and 80% in favor
- Initial opposition was from those with short commutes; however, they strongly supported the 48/96 after the trial period
What Do You Do Now????

- Based on the information provided, we respectfully request that all members seriously consider the merits of the 48/96 schedule.
- Specifically, please contact your Local 3631 Board members and request a trial period of the 48/96 and
- Please take 30 seconds to fill out the brief questionnaire and indicate whether or not you’re in favor of a TRIAL PERIOD. This is the only way to know if we should proceed.
- The Link to the questionnaire is:

48/96 Questionnaire

Thank You!
